We Improve your
Logistics with
All Security

We have designed a safe and silent goods lift with cabin under the most advanced technology for goods vertical transportation, allowing specialised workers on board, for 1000, 1500 and 2000Kg.

MAIN ADVANTAGES:

- Optimises staff time
- Helps with order and organisation
- Does not need a masonry room machine
- Functional, comfortable & silent
- Low power consumption (environment-friendly)
- Minimum maintenance
- Excellent quality price ratio
- Low pit and headroom
- Secure for the users and for maintenance workers

SAFETY:

- Installation into a closed shaft with resistant masonry or metallic walls
- All accesses protected by doors with electrical interlocked system
- Emergency stop button
- Closed cabin
- Final limit switch
- Manual lowering device
- Automatic re-leveling for the lift to remain stable during loading and unloading operations
- Pressure switch
- Thermal relay for motor protection
- Mechanical safety locking pins for works under the platform
- Immaterial barrier in cabin (photoelectric cell)
- Phone in cabin
- Automatic rescue system in case of power cut
- Immediate stop of the cabin in case of broken cables

GENERAL FEATURES:

- Galvanized cabin
- Silent hydraulic power unit
- Direct acting piston until 4.5m, and indirect acting 2 to 1 piston until 14m
- Speed until 0.15 meters per second
- Cabin clear height 2100mm
- Non-slip flooring with tread plate
- Baseboard
- Ceiling hatch
- LED lighting

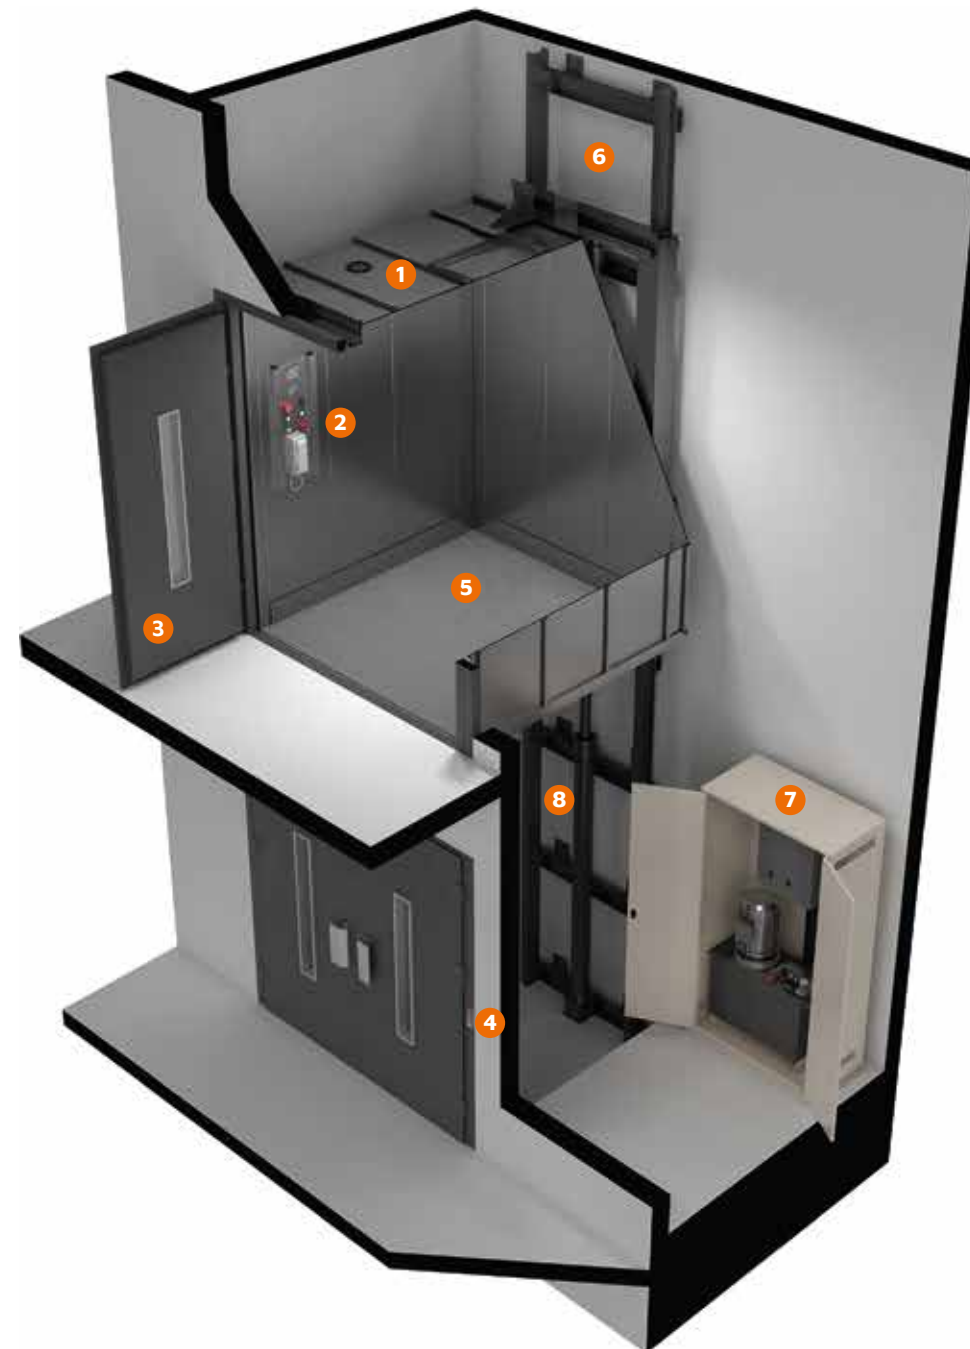

OPTIONS:

- Inox cabin (walls & ceiling)
- Cabin (walls & ceiling) in steel plate with polyurethane coating RAL 7032
- Pre-assembled electrical installation
- Automatic cabin doors
- Built-in lift telephone
- Half-height wall guard
- Machinery cabinet

USEFUL FOR:

- Industries
- Warehouses
- Shops
- Department stores
- Agribusiness
- Hotels
- Restaurants

Model	HCA 100	HCA 150	HCA 200
Load	1000 Kg	1500 Kg	2000 Kg
Area	≤3 m ²	≤ 4,5 m ²	≤ 5,6 m ²
Maximum travel for direct piston	4500 mm		
Maximum travel for indirect piston	14000 mm		
Cabin height	Starting from 2100 mm		
Headroom	Cabin height + 600 mm		

- 1 LED spotlights
- 2 Cabin operating panel
- 3 Landing doors
- 4 Landing operating panel
- 5 Cabin
- 6 Guides
- 7 Machinery cabinet
- 8 Piston

Goods lift with workers on board for industry and warehouses or points of sales. Improves the movement of goods permitting the same worker to load and unload.

DIRECTIVE & STANDARDS:

This product has been manufactured according to Machinery Directive 2006/42/EC.
The following Standards & Rules have been considered for its design and manufacture:
UNE-EN ISO 12100:2012
UNE-EN 81-20:2017

NOTIFIED CONTROL BODY
